Investigate the Relationship between Intellectual Capital and Tendency to Innovation among the Faculty of the Shahid Chamran and Jondi Shapour Universities of Ahvaz

Original Research, D123

Savari Pour V, Naveh Ebrahim AR, Erfani Khanghahi M.

ABSTRACT: This study is an applied research and in implementation of it, the descriptive-correlation method has been used. The relationship between intellectual capital and tendency to innovation in the faculty of Shahid Chamran and Jondi Shapour Universities of Ahvaz has been studied. The results of the study indicate that intellectual capital has a significant relationship with the tendency to innovation and this relationship is stronger in the two universities. Intellectual capital is composed of four components: human capital, structural capital, relational capital and organizational capital. Intellectual capital helps to increase the productivity of the organization and lead to innovation. It also plays an important role in the development of the organization by enhancing the level of innovation. Innovation is considered one of the most important and essential features of an organization and its success. Therefore, it is concluded that intellectual capital can be considered as an important factor that relates to organizational factors which directly cause to improve and enhance the level of innovation in the organization.
