ABSTRACT: This article investigates the relationship of emotional intelligence and leadership style in middle management in the media sector. The study aims to understand how emotional intelligence (EI) relates to different leadership styles among middle managers. The research findings indicate that Transformational-oriented style is explained by empathy; and Pragmatic style is explained by self-awareness and empathy.

Keywords: Emotional Intelligence, leadership style, Middle Manager
ABSTRACT: Today the subject of internationalization of higher education curricula across the world has been accompanied with the issues such as rapid changes, globalization, and the integration of educational systems. Some countries have been leading the way in this regard, including the United States, Finland, and Japan. The aim of this paper is to explore the various activities and methods of teaching and learning employed in these countries to achieve internationalization in their higher education curricula.

Keywords: Internationalization, Higher Education, curricula
**ABSTRACT:**

Adolescents egocentrism is a controversial concept in cognitive developmental theories and there are little studies that investigated the relationship between family communication dimensions (FCP), separation-individuation (PATHSEP) and imaginary audience (IA) in Iranian adolescents. In the current study, the relationship between FCP, PATHSEP and IA was examined. Results of this study clearly revealed the mediation role of PATHSEP between FCP and IA. This explanatory model is elaborated in the article.

Evaluation of Relationship between Personality Traits and General Health of High School Students

Zarei, E. Zeinalipour H. Tayebi sough M. Adli M. and Tayebi sough A.

**ABSTRACT:** The current research has been performed due to evaluation of ties of personality traits and general health. 205 students were involved in the study. Correlation analysis was used. There is a negative relationship (p < 0.05) between Neuroticism and general health of students. Neuroticism predicts 0.452 % of variance of general health.

**Keywords:** Personality Traits, General Health, Female Students
Network Policy Making: A Necessity for Today’s Organizations

Kamel M. Alvani S.M. and Mohammadi Moghadam Y.

ABSTRACT: The highly changeable and inconstant conditions of organizational environments are presenting a new way of thinking and working. Organizations can no longer rely on internal and isolated decision making. The necessity of policy making in a network structure is examined in this study. The relationship between network structure and policy making is discussed. The findings of this study could be helpful in preparing organizations for progressing in this direction. The empirical results of this study provide theoretical and applied suggestions in order to prepare organizations for progressing in this direction.

Keywords: Policy making, Decision making, Network structure
