Design and Explanation of Individual Aspects of Trauma Controlling Organization in Public Sector

Original Research, D58

Vahedi, M. Shekari, H. and Shirazi S.
ABSTRACT: In an organization design, individual, organizational and environmental aspects are considered. This paper studies the impact of trauma on trauma controlling organization in public sector, while this variant has indirect impact of 0.41 in the organization.

Keywords: Trauma; Public Sector; Individual Aspects

ABSTRACT: The improvement of instruction has been a goal of educators as far back as the teachings of the Greek philosopher Plato. The improvement of instruction is now a necessity, and yet it is certain that no one instruction method fits all students. This is where individualized instruction comes in. Technology has risen to the challenge of individualized instruction with computer-assisted instruction (CAI). This paper describes individualized instruction approach and define and describe its approach and advantages and also disadvantages of individualized instruction.

Keywords: Individualized Instruction, CAI

The Comparative Analysis on Mathematical Achievement, Self- efficacy, and Self-concept Based the Perceived Classroom Climate

Original Research, D60

Kakojoibari, A. and Sharifi Saki, Sh.

ABSTRACT: The current study is aimed at conducting a comparative analysis on mathematical achievement, self-efficacy, and self-concept, based on the perceived classroom climate. The study involved a total of 300 students, and the data was collected through survey questionnaires. The results showed that there were significant differences in the mean scores of mathematical achievement among the three groups. The analysis of variance (ANOVA) showed that the effect of the perceived classroom climate on mathematical achievement was significant. Multiple regression analysis further indicated that self-efficacy and self-concept were significantly related to mathematical achievement, and that the perceived classroom climate was an important factor in adjusting these differences. The findings suggest that fostering a positive classroom climate can enhance students' mathematical achievement by improving their self-efficacy and self-concept.

The Study on the Impact of Teachers’ Content Product on Their Performance in Schools of Tehran

Original Research, D61

Norietemad, J.

ABSTRACT: The present research was conducted to study

Keywords: Education, Content Product, Performance,Te
The main goal of this study is to determine prevalence of mental disorders among individuals at the age of 15-65 years in Iran.

Current study showed that prevalence rate of mental disorders is higher among the females than male (34.4% VS 21.1%).

Keywords: Anxiety; Depression; Somatization; social performance disorder; Mental Disorders
Masters Students’ Views towards the Ratio of Iran IAU-Sari Branch Faculty Members use of Human Relations Index

Original Research, D63

Mirsaidi, G. and Yaghoubi, M.

ABSTRACT: The purpose of this study was to evaluate Masters Students’ Views towards the Ratio of Iran IAU-Sari Branch Faculty Members use of Human Relations Index. The results showed that more students have positive views towards the ratio of Faculty Members use of Human Relations. The students feel that the Faculty Members are more willing to try to communicate more effectively with them and teaching space become more motivated for them.

An Examination into the Elementary Schools Teachers' Viewpoint on the Role of Assistant Principals

Original Research, D67
Mahdavi, N.

ABSTRACT: The present research has employed a qualitative approach with a phenomenological method to assess the viewpoint of teachers on the role of assistant principals within the enacted curriculum. The findings indicate that effective assistant principals are influential factors in encouraging the teachers to employ innovative methods and avoid the traditional methods.

Keywords: Enacted Curriculum, Role, Viewpoint, Assistant Principals
The main purpose of this research is to survey the relationship between social capital and knowledge management with the organizational intelligence components in the tax affairs organization of Tehran. The research findings indicate that relative and cognitive capital can predict the organization’s intelligence, and learning organization and digital resources management components are predictors of organizational intelligence. The study contributes to the organizational intelligence and social capital literature by highlighting the importance of knowledge management in creating organizational intelligence.

Keywords: Social capital, Knowledge management, Organizational intelligence.
The Relationship between Financial Capital and Abnormal Yield in Newly-Arrived Companies in Tehran Stock Exchange

Original Research, D69
Barati, S. and Abdoli, M.

**ABSTRACT:**
Business and commercial units play significant role in economic structure of a country. Today, business units as main producers of added value, residual income and book value with abnormal yield of stock in newly-arrived companies to Stock Exchange.

**Keywords:**
Financial capital, Abnormal yield, Economic added value
The Relationship between Religious Beliefs, Optimism and Moral Health of the University Students

Original Research, D70

Zakery, J. Makari, R. Pir Cheraghal, A. and Zahedi, O.

ABSTRACT: The target of the current study is to assess the relationship between religious beliefs & optimism and moral health. It is expected that the variables of religious beliefs and optimism, respectively, were the factors of forecasting the moral health.

Keywords: Religious beliefs, Optimism, Moral health

Investigating the Impact of Restated Financial Statements on Persistence of Financial Performance

Original Research, D71
Khatibzadeh, P. Abdoli, M. and Dehdar. F.

ABSTRACT: The present research investigates the relationship between restated accounting figures and the persistence of financial performance. It is observed that increasing financial leverage results in a reduction of the persistence of financial performance, while increasing intellectual capital results in an increase in the persistence of financial performance.

Keywords: Restated Financial Statement, Persistence of Financial Performance

Earnings Management and Intellectual Capital

Original Research, D72

Galdipour, S., Rahimian, F., Etemad, A., and Panahi, H.
ABSTRACT: The present study aims to investigate the relationship between intellectual capital, its development and earnings management. Using the modified Jones model, discretionary accruals were applied as the criterion for determining earnings management. There is a significant relationship between intellectual capital and earnings management, but there is no significant relationship between intellectual capital development and earnings management. Keywords: Intellectual Capital, Intellectual Capital Development.
ABSTRACT: The goal of this study was to determine gaps in perceptions and expectations of students in University of Tehran using educational service quality, thus it should be attempted to eliminate or mitigate gaps in current and optimal statuses.

Keywords: Educational service; Student University; Quality; Seroquel

Performance Measurement based on the Created Value Added by using the Balanced Scorecard

Original Research, D74
Sherafat, A. Vatankhah-Tafti, A. and Davoodi, S.M.

ABSTRACT:
There are various methods developed for the performance evaluation. Most of the measurement models employ scoring-
based methods. Therefore, Balanced Scorecard and brainstorm methods are used to determine the role of each department in creating value added.

Keywords:
Performance Evaluation, Value Added, Balanced Scorecard

Internet and Social Development in Teens

Original Research, D75
Aslani, N.

ABSTRACT:
The basic objective of the present study is to review the role of using the internet on social growth of guidance school students. The research findings show that the use of the internet has a positive impact on the compatibility and the spirit of cooperation and collaboration. However, the rise of internet use time is reduced compatibility.
ABSTRACT: The purpose of the present study is to investigate the effect of the Philosophy for Children program (P4C) on reducing trait anger in teens.
The present study aims to assess the relationship between information asymmetry and the cost of equity capital in listed companies. It suggests that information asymmetry can lead to an increase in the cost of equity capital; however, this hypothesis can be confirmed in case of utilizing control variables.

The present study was designed to investigate the effectiveness of mindfulness in the prevention of drug relapse. Method: The study included male drug abusers who were randomly assigned to either the mindfulness training group or the BDRC (Behavioral Drug Reduction Counseling) group. The study lasted for 6 weeks.

Elementary Education, Core Competencies, Competency-based curriculum, Higher Education.

The main question in this research was the identification of core competencies in the field of elementary education in Iran. This study aimed to identify the core competencies of elementary education by evaluating the literature and conducting interviews with experts and educators.

Mindfulness training, Behavioral Drug Reduction Counseling, Drug Abuse

This research aimed to evaluate the optimum portfolio selection using with particle swarm algorithm. For this purpose, the algorithm was applied to select the best portfolio from a set of assets. The results showed that the particle swarm algorithm can perform better than other optimization methods.

Growing demands in finding new strategies to maximize organizational effectiveness have resulted in the recognition of psychological capital as a significant factor. This study aimed to evaluate the relationship between psychological capital with perceived organizational support, job satisfaction and affective commitment.

The general objective of this study is comparison of managers' critical thinking of the elementary school, guidance, and classrooms score lists. Data analysis done by regression analysis indicates that FDI cognitive style interprets 8.8, 9.2, and 11.6% variances for dependent variables (scores of reading comprehension, English learning, and educational achievement). This indicates that the higher FDI cognitive style is, the higher English text comprehension, English language learning, and educational achievement will be.

This research is intended to examine on relationship among Field dependence-Independence (FDI) cognitive styles and classrooms score lists. Data analysis done by regression analysis indicates that FDI cognitive style interprets 8.8, 9.2, and 11.6% variances for dependent variables (scores of reading comprehension, English learning, and educational achievement). This indicates that the higher FDI cognitive style is, the higher English text comprehension, English language learning, and educational achievement will be.
