**ABSTRACT:** My cognitive envisage says that, the remarkable technological advancement is one of the best determinants of human celerity. So the 21<sup>st</sup> Century has brought the most revering solution for our societal ease, which is drastically uplifting our destined communication process just not to discover each and other through a mute observation but communicate the fellow feeling through an ethos spirit and the elite relation in deed. Moreover it has been truly conducive for us to embellish the law abiding profession and on the other hand the existence of societal actuality in style. Moral existence means communal acceptance and communication means to convey the message to my opposition through the dogmatic elegance of technology. In other words it is literally true that, we do express our self, expose our needful behavior and most notably decipher our ignited thoughts to the others, where Smart Phone has already been the most indelible medium of communication. It has stimulated the entire mankind to draw the best relational cameo for the perceptual life to survive.

**Key words:** Morality of Smart Phone, Global Credence of Communication, Virtuous opulence of this noticeable medium (Smart Phone)

### INTRODUCTION

Communication is an understandable process in between 2 or more individuals, where all the persons not only do share their feelings, ideas, perceptions, envisions, realizations but to form a common objective through a proper justification within a very short while. It is truly essential in our day-to-day life and to regulate our professional commitments in a befitting manner. In this regard smart phone does play a sheet anchor role amongst the desirous communicators, who are really willing to communicate to reach the destined objective and to establish rational association. So smart phone is one of the vital determinants now to lead the modern life style and to communicate the agreeable message in a befitting manner in deed. So that lot of productive relationships is grown for each and other to be smoothly alive with an indelible existence in this enviable universe. Because a smart phone is an advanced format with a unique mobile operating system in deed, which conglomerates all the features from personal computer and that is having high speed mobile broadband facility already. This is one of the most dynamic innovations in all over the World.

#### The Glimpse of Smart Phone:

A Smart Phone is a promoted device of communication with the most advantageous metamorphosis. It has an alluring computing dexterity. It is truly conducive to effect upon the individual engagements such as Firm Productivity. In other words Smart Phones are the most phenomenal electronic device to capture the entire social clay. The Smart Phone is the refulgent indication to exhibit the class for a society. It is very true that, people of each and every individual class do use this sophisticated

device for snatching the radiance of social media. Moment the entire Globe is in the grip then people do feel blissful to reach from one destined culture to another just within a blink of an eye. So this Smart Phones do have the World-Wide reputation to be enriched communicative class at all.

#### Smart Phones and Multidisciplinary Impacts:

- Smart Phone has basically been assigned for verbal communication. It is a comprehensive tool to communicate the status of an organizational productivity. At the same time it is truly emphatic to organize a meeting in between professionals, colleagues and friends at every now and then. But for these technological leniencies the entire organizational base has lost the traditional paradigm in deed. As a matter of the fact is all the individuals do pay their sincere attention to communicate through emails and websites respectively. Apart from that, Smart Phones do cause for miss communication as well. Because a class of people does like social media statements and another class do prefer physical statements. According to my rational perspicacity all the smart phones do have some exquisite applications, which is truly evident from the other applicable process in the market. Most of the people do invest their precious time for chatting with individuals, who are accordingly available in the same social community site. As a result they are gradually losing their working efficiency and they are inviting some unavoidable organizational conflict at every now and then.

- Smart Phone is the captivating tool for personality development. It has already changed the personality of human being. Each individual does lead their life through an updated fashion and the civilized

passion in style. Smart phone has groomed their life through the broad usage of technology.

- Smart Phone is for good standard of living.

This electronic device has been very advantageous for good standard of human life. People are flying from one province to another through the unique technological growth. Where smart phone is playing a sheet anchor role for this versatile advancement.

- Smart Phone is a great career option. As per the modern technology students/people who are desirous to learn this technology, they are being undoubtedly satisfied to apply this stunning technology for their prospective career.

- Smart Phone is a great Research Plot. As per my envisage lot of upcoming researchers are projecting their self for the scholastic research about Smart Phone. So they are being gradually enriched in terms of global recognition and foreign currency respectively.

As per article of Abau-Shanab and Haddad (2015), the advent of new touch technologies and the wide spread of smart mobile phones made human embrace technology more and depend on it extensively in their lives. With new communication technologies and smart phones the world really becomes a small village. Although these technologies provided many positive features, we cannot neglect the negative influence inherited in these technologies. One of the major negative sides of smart phone is their side effects on human health. This paper will address this issue by exploring the exiting literature related to the negative side of smart phones on human health and behavior by investigating the literature related to 3 major dimensions: health, addiction and behavior”.

#### **Noticeable Impacts of Smart Phones:**

- Students do lose their self-regulation of academic advancement due to the rapid use of smart phone.

- Smart Phone may cause the internal hamaze of brain due to the continuous chatting and limitless usage of ware less application protocol.

- Smart Phone damages the reflection of eye because it is such an active medium to highlight the social media for the adolescents.

- High smart phone users do suffer from their problematic behaviors such as attention deficits and aggression etc.

- Excessive use of smart phones may cause the slipping problems for adolescents. Apart from that, smart phone creates a real problem in the class rooms. Students do focus on social media rather than to concentrate upon the crucial lecture of respected teachers.

This literature (Hans G. Friedel, 2013) says that, “Smart phones have now become common place with middle and high school students. Where as many class room management policies prohibit mobile phone use and text messaging in the class room, a growing body of research has found that, mobile phones and short message service (SMS) texting can positively contribute to student learning by felicitating synchronous collaborative learning provide an infrastructure for the delivery of interactive content and assess student learning and participation. This mobile infrastructure can be used inside and outside of class rooms. Researchers have recognized the potential for these devices to foster collaboration and extend learning opportunities by allowing anywhere-anytime learning.

This review of the literature examines and summarizes the current body of research on how smart phones have been used to raise student’s achievement”.

#### **Detections and Preventions:**

Smart phones should be entirely prohibited inside the class room and examination hall. If it is found that, any student is talking or texting smart phones inside the class room or examination hall then he/she should be immediately penalized in deed. Moreover no student shall be allowed to use smart phones until their ages are minimum 18. So that, so that they will not be able to use the ultra modern device until they are being matured. Then it shall be really advantageous for our confident society to stop the miss utilization of smart phones. On the other hand students will be concentrating more upon education and their behavioral aggression will be evaporated. They shall understand the social ethics and as a result they will be gradually enriched for their inestimable academic future and in fine they would be the distinguished path finder for our next generation at all.

#### **IMPLECATIONS OF SMART PHONES:**

All the social community sites like Face Book, Twitter, and Instagram have been the ultimate medium of communication. These have stopped the physical movement and direct socialism already. Moreover people are losing their social confidentiality at every now and then. They are destroying their utmost dignity through the bottomless use of social media in all the regards. Therefore our decorous society is being continuously affected. Because a real lacuna has taken place through the fleeting change of communication.

I believe that, society is our cosmic platform for our needful sustainability but it is losing the vital uniformity through our irrational reflection of behavior.

### **Corporate Social Responsibility:**

1. Define a Mission: We should always think that, why and when we shall be opting for this device to maintain the ethical cameo of our society.

2. Global Impact: We shall have to exhibit the united behavior. We shall have to understand the consequence of this device and accordingly we shall have to utilize the same.

3. Social Message: We should be providing the justified message about smart phone. Furthermore the value of smart phone shall have to be equally approved from the society. Then only smart phone will be popularized and publicized in all over the Globe.

According to Lusekelo and Juma Maimu (2015), Smart phones act mobile entertainment unites where a user can: watch videos, listen to music, update blogs as well as audio and video blogging. The aim of this study was to review the impact of smart phones on academic performance of students in higher learning institutions. Intensive literature review was done finding out the disadvantages and advances brought by smart phones in academic arena. In the future, research will be conducted at Ruaha Catholic University to find out whether students are fitting from using smart phones in their daily studies and whether do they affect their GPA at the end of the year.

### **CONCLUSION**

Smart Phone is the scholastic technological reaction for our diversified social realm. Successful Communication process incorporates the entire Globe just under the common umbrella. But it has the winsome application not only for the hazardless society but to reform the most disciplined civilization through our communal academic perpetuity.
