**Relationship between emotional intelligence and leadership style in middle manager**

**Original Research, C1**

**Khorshidi A, Tarkhan F. and Naghsh Z.**

**ABSTRACT:** This article investigates the relationship of emotional intelligence and leadership style in middle managers. The study aims to explore how emotional intelligence influences different leadership styles. The research highlights that transformational-oriented style is explained by empathy; and Pragmatic style is explained by self-awareness and empathy.

**Keywords:** Emotional Intelligence, leadership style, Middle manager
Internationalization of higher education curricula across the world

Original Research, C2

Behjat Ardakani, F and Araghieh A,

ABSTRACT: Today the subject of internationalization of higher education curricula has been accompanied with the issues such as rapid changes in the educational systems, comparative study of teaching and learning methods, and the need for a global perspective in the curriculum development. This paper focuses on the internationalization of curricula in countries like the United States, Finland, and Japan, examining the approaches and strategies used to achieve a more globalized and integrated educational experience for students.
Family Communication dimensions, Separation-Individuation and Imaginary Audience in Iranian adolescents

Original Research, C3

Jowkar B., Rahimi M., Zare M. and Barzegar Bafrooei K.

ABSTRACT:

Adolescents

Keywords:

Conversation, Conformity, Separation-Individuation
The current research has been performed due to the evaluation of the relationship between personality traits and general health of high school students. The study involved 205 students and found a negative relationship (p < 0.05) between Neuroticism and general health of students. Neuroticism predicts 0.452% of variance of general health.

Keywords: Personality Traits, General Health, Female Students
Network Policy Making: A Necessity for Today’s Organizations

Original Research, C5

Kamel M. Alvani S.M. and Mohammadi Moghadam Y.

ABSTRACT: The highly changeable and inconstant condition of organizational environments, including public and private sectors, demands the need for network structures to be used as a strategy for moving towards a more effective management. This strategy is based on the idea of using social capital, which is the social process and structures that provide some advantages to an individual or organization to have a better opportunity to achieve or maintain a competitive advantage. The network structure can also help to manage conflicts and increase the possibilities of benefiting from the collective knowledge. The network structure has been promoted as a new method of policy making and is expected to provide an effective solution to many organizational problems. This paper has reviewed the relevant studies and finally provided theoretical and applied suggestions in order to prepare organizations for progressing in this direction.

Keywords: Policy making, Decision making, Network structure.
