ABSTRACT:
This study aims to investigate the effect of cooperative learning on the confidence. This study was a quasi-experimental study in which the statistical population was students of junior high school in the Field of Science and Research, and the sample was selected through a random method. The data were collected through a self-efficacy questionnaire and the data were analyzed using descriptive and inferential statistics. The results showed that cooperative learning increases the confidence of girls more than boys.

The current study is aimed to identify and examine the factors limiting the development of virtual courses in Hormozgan University. The research sample was the students of Virtual University virtual courses of Hormozgan University. The data were collected through a self-evaluation questionnaire and the data were analyzed using descriptive and inferential statistics. The results showed that cultural factors, social factors, and polygamy are effective in limiting the development of virtual courses in Hormozgan University.

The purpose of this research is to study the relation of the effective factors on decreasing tax assertiveness and tax diagnostic difference in the companies. The research sample was the companies listed in the Tehran Stock Exchange. The data were collected through a self-evaluation questionnaire and the data were analyzed using descriptive and inferential statistics. The results showed that the relationship between the prior period adjustments and tax assertiveness and tax diagnostic difference in the companies is positive and significant.

Forecasted earnings provide significant information for investment and other financial statements users. In recent years, the accuracy of earnings forecasts has been an important issue in the field of accounting. The research sample was the companies listed in the Tehran Stock Exchange. The data were collected through a self-evaluation questionnaire and the data were analyzed using descriptive and inferential statistics. The results showed that financial crisis and auditor's opinion variables were not affective on earning forecast accuracy.

The main purpose of this research is to identify and investigate the influence of institutional ownership on the growth opportunities and dividend policies. The research sample was the companies listed in the Tehran Stock Exchange. The data were collected through a self-evaluation questionnaire and the data were analyzed using descriptive and inferential statistics. The results showed that there is a significant relation between institutional ownership and growth opportunities and dividend policies.

CT:

This study was performed to determine social-cultural polygamy-related factors. This is a descriptive-correlational study in which the statistical population was the families of Hormozgan city. The data were collected through a self-evaluation questionnaire and the data were analyzed using descriptive and inferential statistics. The results showed that sexual beliefs are effective as a subjective factor.
