The Effectiveness of Life Skills Training on Achievement Motivation and Life Satisfaction of Students

Lak, Z. Rajabi, S. Moazedian, A. Pournikdast, S. and Sabetimani, M.

Abstract: Since a considerable part of students' lives are spent at school, a huge contribution is made by the schools to education. This research aimed at investigating the effectiveness of life skills training on the achievement motivation and life satisfaction of students. The sample included 150 students (75 girls and 75 boys) selected by stratified random sampling. The life skills training program was conducted for the experimental group, while the control group did not receive any training. After the training, a significant increase was observed in the achievement motivation and life satisfaction of the experimental group compared to the control group. The findings of the research have important implications for students regarding education and counseling services.
