Presents a Conceptual Framework of Supervisory System for Teachers

Original Research, D121

Mosavi F.

ABSTRACT: This research is an attempt to study the supervisory system of elementary school teachers in Kermanshah Province in order to develop a supervision model. The index values of the model were determined by experts and scholars as 0.36, 0.21, and 0.43 respectively. The value of 0.36 for simplicity and 0.21 for efficiency as well as 0.43 for the model’s validity were assigned to the model. The model was evaluated using factorial analysis and the results showed a 91.78% suitability ranking by the scholars which shows a high validity of the model in the eyes of the scholars.

Evaluating the Relationship between Economic Value Added and Capital Structure in Companies Listed at Tehran Stock Exchange

Original Research, D125

Baybordi A, Kermani E, Farzaneh Kargar E.
**ABSTRACT:** Maximization of wealth is the major purpose of a business unit. Nowadays, economic value added is considered to be the most appropriate measure to evaluate the performance of a business unit. The limitations of traditional accounting measures such as net income are clear. By using economic value added, it is possible to control for differences in capital structure and income tax rates among companies. The results of the correlation analysis and the results of the linear regression method indicate a significant and positive relationship between economic Value Added and stock return.

**Key words:** Economic Value Added, Capital Structure, Rate of Return, Cost of Capital

Impact of the Second Teacher (Teacher Contributor) On the Academic Achievement of Students in Mathematics

Original Research, D128

Asadi F.

ABSTRACT: The purpose of this study was to investigate the influence of the second teacher (teacher contributor) and comparison with student teachers on the academic achievement of students in a secondary school in the city of Ahvaz, Iran. The study was conducted in the 2012-2013 academic year with 100 students, including 60 males and 40 females, divided into two groups. The data was collected through the Math Achievement Test, which was scored out of 50 points, and the General Education Questionnaire. The findings indicated the following key points: 1. The second teacher improved all students' academic achievement; 2. The second teacher could effectively teach students with different learning levels; 3. The second teacher contributed to increasing students' sense of responsibility; 4. The second teacher helped reduce academic failure; 5. The second teacher contributed to a better performance in the Math Achievement Test.
